

OBJECTIVE

I seek to do repetitive tasks which are dull, dirty, and dangerous to free up valuable employees for more meaningful tasks.

SKILLS

- Fast learner: easy to program and use
- Communicates well with most industrial equipment
- Works well with others: works cage free alongside employees
- Improve production speed, precision, and quality
- Reduce operation costs, waste, and scrap

EXPERIENCE

MACHINE OPERATOR

2008 – Present

I was deployed to pick and place materials weighing up to 5kg in machine tending operations such as machine shops, packaging, and assembly.

PACKAGE HANDLER

2012 – Present

In 2012 I doubled my strength to 10kg. This made me a valuable employee in palletizing of boxes. My added strength also gave me the ability to complete my tasks as a machine operator working with heavier materials.

QUALITY INSPECTOR

2015 – Present

Given the proper tools, I can quickly do vision inspections and make 3D scans of parts. With the new model, 3kg, I can move more quickly and complete the tasks from my previous experience but on a smaller scale.

OTHER HELPFUL INFORMATION

www.airhydropower.com • www.universal-robots.com

AVAILABLE IN 3 MODELS:

- Payload of 3kg with a reach of 19.7in
- Payload of 5kg with a reach of 33.5in
- Payload of 10kg with a reach of 51.2in

UR COBOTS DO:

- Work 24x7, including holidays without extra pay
- Perform quietly with quality and precision
- Handle dull, dirty, and dangerous tasks
- Free-up employees to do more useful tasks
